PRESS RELEASE

ASWGA PRESIDENT ATTENDS DFAT/CSIRO SEMINAR IN CHINA

The President of the Australian Superfine Woolgrowers' Association Kevin Dunn attended an important Seminar last week in China as part of the CSIRO project team aiming to improve the way in which Australian superfine wool is used in Chinese mills. This is part of a bilateral programme between DFAT and China providing assistance to boost performance.

Kevin Dunn from Horsham, Victoria made a presentation at the seminar in Nanning on the production trends for Australian superfine wool and opportunities for sourcing the right type of superfine wool for their particular product needs.

He then accompanied the CSIRO team in visiting mills which use Australian superfine wool in the Zhangjiagang area, North West of Shanghai, to further discuss the issues raised at the Nanning seminar

CSIRO will continue working with ten mills over the next twelve months, providing assistance in improving performance in the mills through to lifting the quality and performance of the final apparel.

Kevin Dunn stated that this most important project with China the largest importer of greasy Australian superfine wool should be of significant benefit to Australia's superfine wool growers.
